- 進階檢索

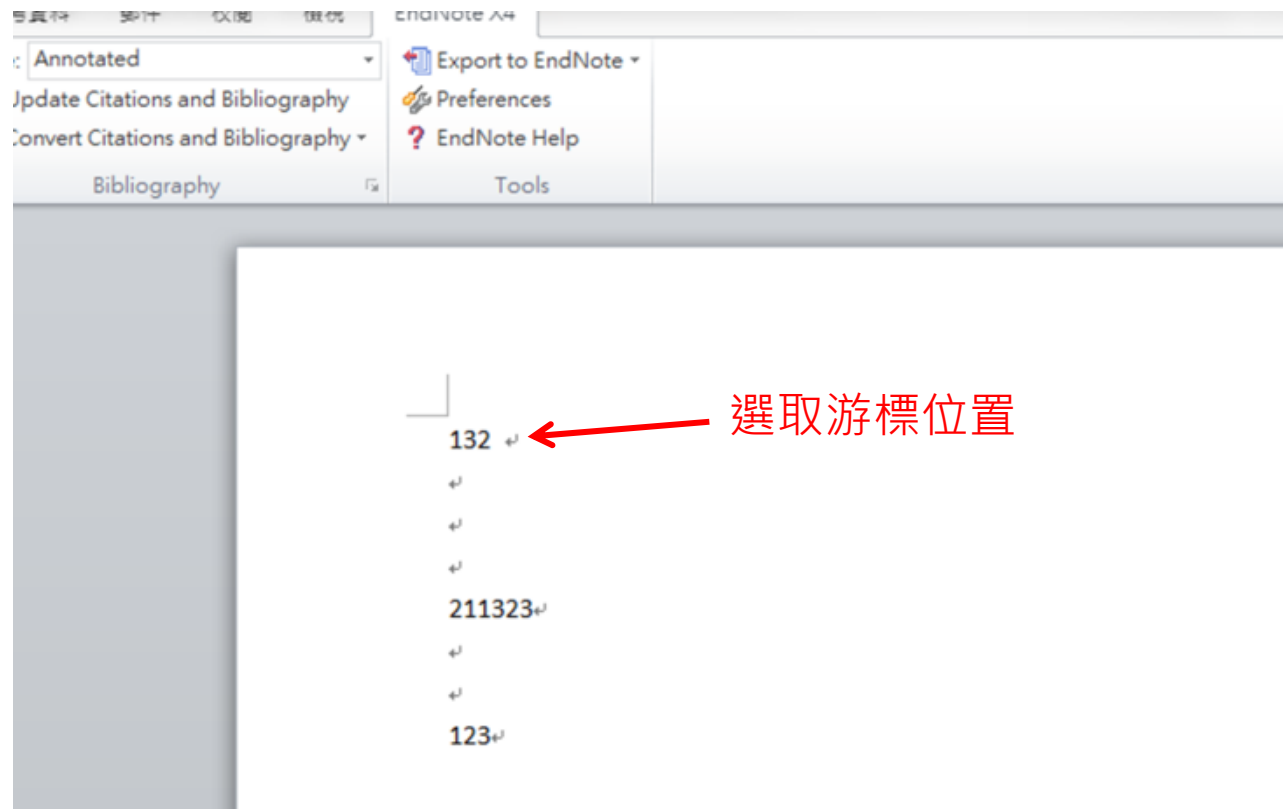

A screenshot of an advanced search interface. The interface includes tabs for "Preview", "Search", and "Quick Edit". Below the tabs are buttons for "Search" and "Options". A dropdown menu labeled "檢索對象清單" (Search Object List) is set to "Search Whole Library". To the right are checkboxes for "Match Case" and "Match Words". The main search area contains three rows of criteria: "Author", "Year", and "Title". Each row has a dropdown for the field, a dropdown for the operator (all set to "Contains"), and a text input field. The "Year" field is labeled "對照清單" (Reference List). The "Title" field is labeled "欄位清單" (Field List). Below the "Title" field is the label "布林邏輯運算" (Boolean Logic Operation). To the right of the input fields are plus and minus buttons. The label "檢索詞彙" (Search Vocabulary) is placed above the "Year" input field, and "新增或移除欄位" (Add or Remove Field) is placed above the plus and minus buttons for the "Title" field.
